MAHOGANY COLLECTIONS

For centuries, cabinet makers have chosen many species of wood veneer for their beautiful and distinct characteristics. One popular veneer of choice is Mahogany. We, at Century, select only the finest Mahogany veneer – ranging from beautiful swirl - to crotch Mahogany. Over time, wood will adjust to the environment it is in. It will absorb and lose moisture, causing swelling and shrinking. As this occurs, hairline cracks will appear in the veneer. This normal process is a result of the tension on the wood grain, and is referred to as “checking”. It in no way affects the usefulness of authentic Mahogany, and adds character as seen in many fine antiques.
